

Cat5e & Cat6 Patch Cables

Part No. :

M408-C5e Cat5e
M408-C6 Cat6

Feature

RJ-45 molded boot patch cords are available in various lengths and colors and constructed with 4-pair 24 AWG, Bare copper stranded wires. These cables are constructed with Low Profile boot, protecting the tab without any additional width to the plug making it universally ideal for any RJ45 port, high density or not. UL listed and tested to EIA/TIA standards.

Specifications

- Performance, Design, and Value.
- 100 % Factory Tested , 50 Micro Inch Gold plated contacts
- Meets and exceeds ANSI/TIA/EIA-568B.2-1 hardware requirements
- Slim Low Profile boots for high density applications, no width wasted on boot.
- Backwards compatible to all lower rated category components.
- Stranded bare 24 AWG copper wire
- Safety: UL listed with 94V-0 rated plugs
- Available in 8 colors (Blue, Black, Green, Gray, Orange, Red, White, Yellow)
- Available in 6 lengths (1, 3, 7, 10, 15,25 ft)
